

Innovations in Life Sciences and High-Technology

Ideal Incubator Space

Access world-class lab space for pharmaceutical, diagnostic, or medical device startups—virtually any life sciences idea or innovation, right here in West Michigan. We offer resources to help accelerate the commercialization of your concept, to help move it from research and testing to market reality.

We provide mini labs that are ideal for those who are applying for, or have been awarded, grants through the Small Business Innovation Research (SBIR) or Small Business Technology Transfer (STTR) programs.

Our life science incubator offers:

- Mini labs of ten lineal feet of bench space with cabinetry
- Standard lab amenities with customization for full, half or mini lab options
- Access to over 100 pieces of life science equipment, instrumentation, freezers, fume hoods and bio-safety cabinets
- Very affordable rates, customized to your startup needs
- Access to office space, meeting rooms, an auditorium and conference services
- Close proximity to Van Andel Research Institute, MSU College of Human Medicine, and Spectrum Health Hospitals and other healthcare services

“WMSTI is allowing us to defer the acquisition of over \$250,000 in equipment. We’ve chosen Grand Rapids because of how much WMSTI has lowered the cost of entry. There’s no other incubator like it in Michigan.”

— Barry Nowak, Syzygy Co-founder

“The Initiative helped me find companies in the area to participate in the development, design and manufacture of my inventions. That is a huge advantage over traveling outside of our region to have those needs met.”

— Jihad Mustapha, M.D., cardiologist, inventor, entrepreneur
